

**BLOCKCHAIN SOFTWARE
SOLUTIONS FOR FIDUCIARY
ENTERPRISES**

COMPANY PURPOSE

Eternal Trusts is providing blockchain-based software for trust administrators and wealth managers that can reduce costs, increase transparency, reduce ability for criminal or negligent management, allow for full documentation and compliance across a variety of regulatory jurisdictions

THE PROBLEM

It is difficult for trustees to offer their services to most of the clients:

Trusts maintenance
is very expensive

Trusts creation and
administration
require a lot of time
and resources

Clients would not
prefer to lose
control over their
assets

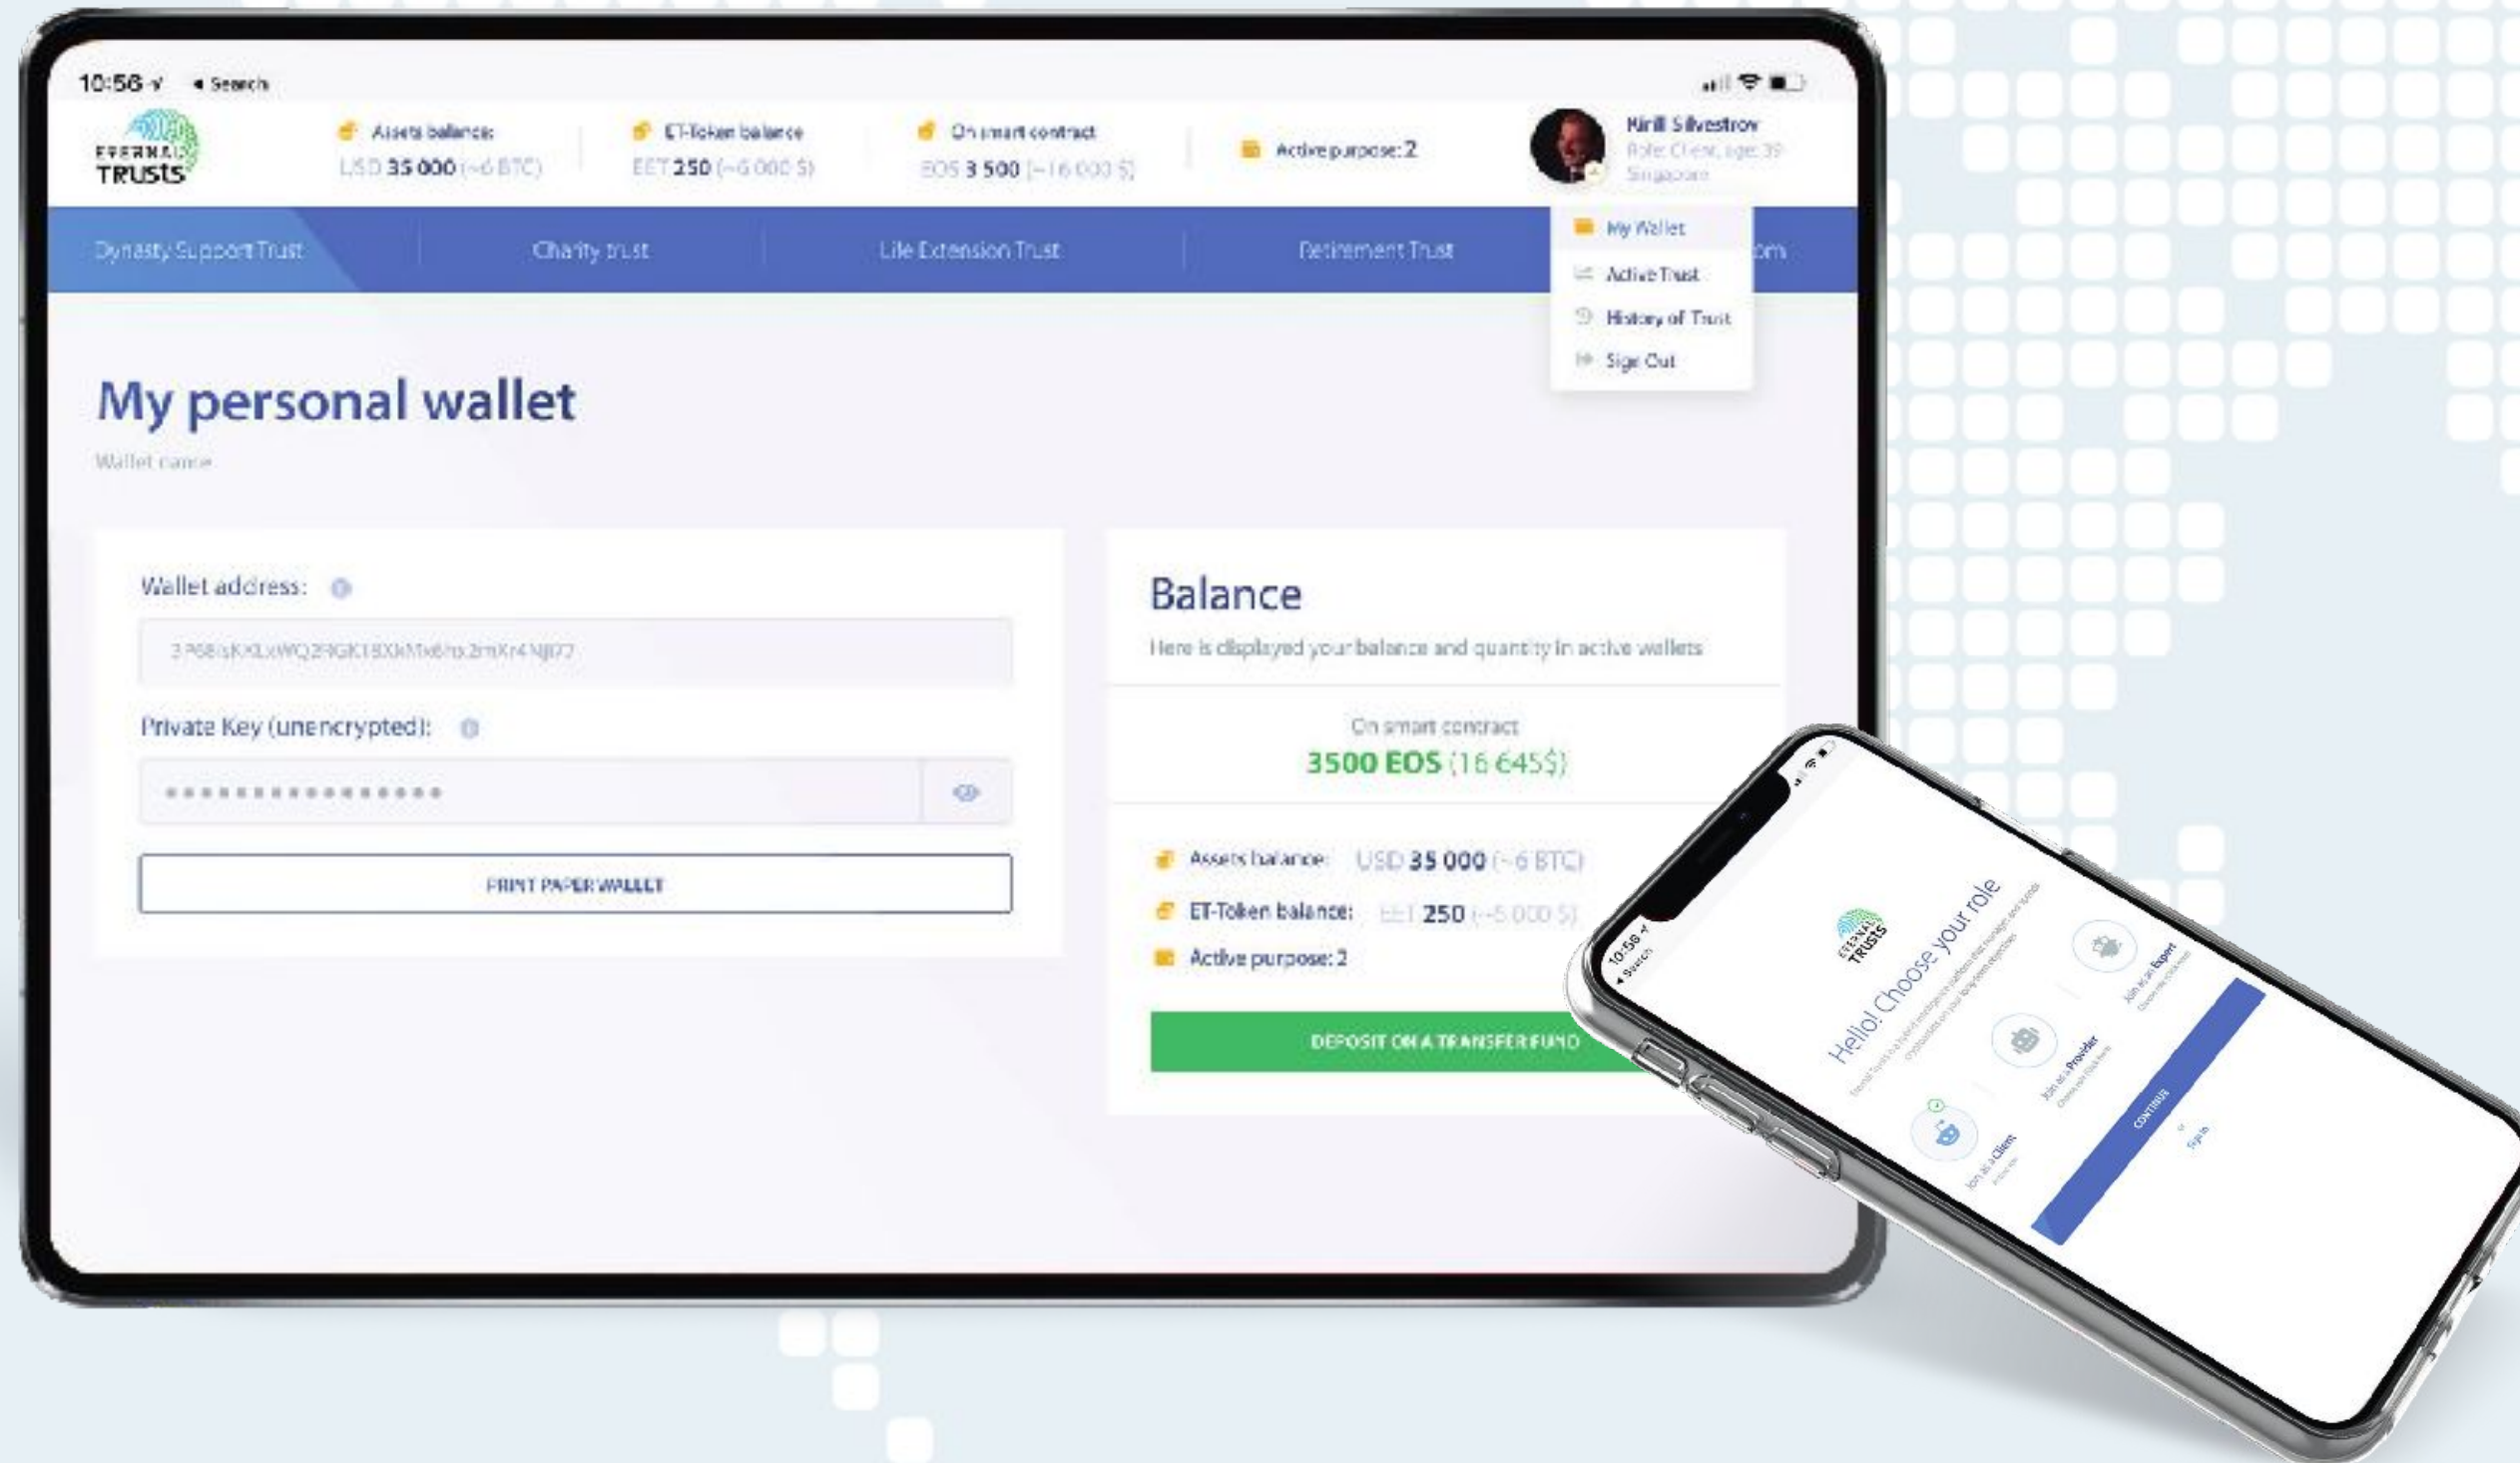

Clients are hesitant
to put in long term
goals because they
don't trust the
trustee companies

OUR SOLUTION - ET DAPP

This is how the future of fiduciary looks like!

Using inherent qualities of blockchain allows us to...

✓ ... SUBSTITUTE LEGAL INFRASTRUCTURE WITH ACCOUNTS ON BLOCKCHAIN

✓ ... ASSIGN ALGORITHMS OF ASSET SPENDING VIA MULTISIGNATURE

✓ ... STORE PURPOSES ON BLOCKCHAIN AND EXECUTE PURPOSES AUTOMATICALLY

USE CASES: A MONEY-MAKING MACHINE

The system of smart contracts and multisignature protocols guarantees that the purposes of the client will be fulfilled optimally and on time, will never be ignored, lost or forgotten.

PROTECT ASSETS

OPTIMIZE TAX
