

ETERNAL TRUSTS: BLOCKCHAIN SOLUTIONS FOR FIDUCIARY ENTERPRISES

OUR MISSION

EternalTrusts is providing blockchain-based software for trust administrators and wealth managers that can reduce costs, increase transparency, reduce ability for criminal or negligent management, allow for full documentation and compliance across a variety of regulatory jurisdictions

OUR SOLUTION IS INTENDED TO SOLVE MAJOR PROBLEMS OF TRUSTEES AND THEIR CLIENTS:

-  Trusts maintenance is very expensive for the end client
-  Trusts creation and administration require a lot of time and resources
-  Clients would not prefer to lose control over their assets
-  Clients are hesitant to put in long term goals because they don't trust the trustee companies

USING INHERENT QUALITIES OF BLOCKCHAIN AND CRYPTO ALLOWS US TO:

-  store clients' purposes on the blockchain perpetually
-  execute purposes automatically (under the control of a licensed fiduciary)
-  assure transparency for dispute resolutions
-  segregate clients' accounts on the blockchain and avoid heavyweight infrastructure of holding companies, Ip's, bank accounts
-  create trust funds with versatile multisignature rights, including the possibility for the client to retain control

The system of smart contracts and multisignature protocols guarantees that the purposes of the client will be fulfilled optimally and on time, will never be ignored, lost or forgotten.

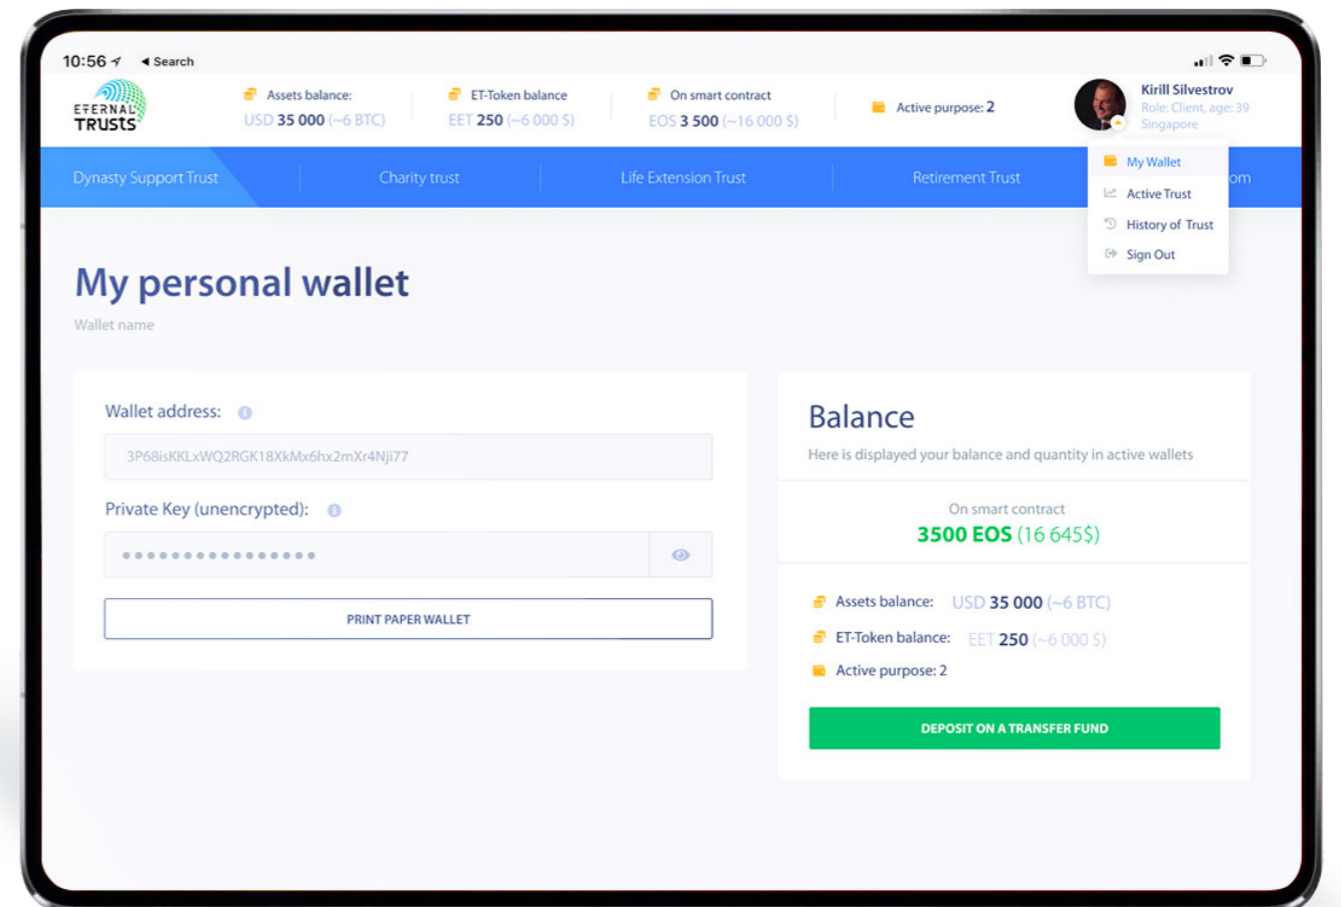

VALUE OF ET PROTOCOL FOR AN ASSET ADMINISTRATOR

-  PERSPECTIVE FOR NEW MARKETS
-  SMARTER DECISION MAKING
-  FASTER OPERATIONS
-  SAFETY OF ASSETS
-  LESS LEGAL RISKS

COOPERATING WITH US YOU BECOME THE OWNER OF WHITE LABEL SOFTWARE WITH FOLLOWING MODULES BUILT-IN:

I MULTISIGNATURE WALLET FOR ACCEPTING, TRADING, AND STORING CRYPTOCURRENCIES	II SAFE CHAT MODULE FOR ONBOARDING CLIENTS, DETERMINING THEIR GOALS, TRUSTED PARTIES, AND POTENTIAL "TRIGGERS" FOR TRANSACTIONS
III FRAMEWORK FOR RECORDING PRIVATE AND PUBLIC DATA OF THE CLIENTS ONTO THE BLOCKCHAIN FOR INDEFINITE, SECURE STORAGE	IV SYSTEM OF SMART CONTRACTS THAT ESTABLISHES RULES OF INTERACTION BETWEEN PARTICIPANTS
V REWARD SYSTEM FOR OPTIMAL ACTIONS ON BEHALF OF THE CLIENT	VI DISPUTE RESOLUTION ON SMART CONTRACTS
VII MODULE FOR MANAGING PORTFOLIOS OF CRYPTOASSETS THROUGH TOKENIZATION AND STABLECOINS	

THIS IS HOW THE FUTURE OF FIDUCIARY LOOKS LIKE!
